

# Java Multithreading

Presented By – Santhosh Kalisamy

# Agenda

What is Java Thread?

Understanding  
Hardware

Thread Lifecycle

Creating Threads

Multithreading

Threadpools

Concurrency

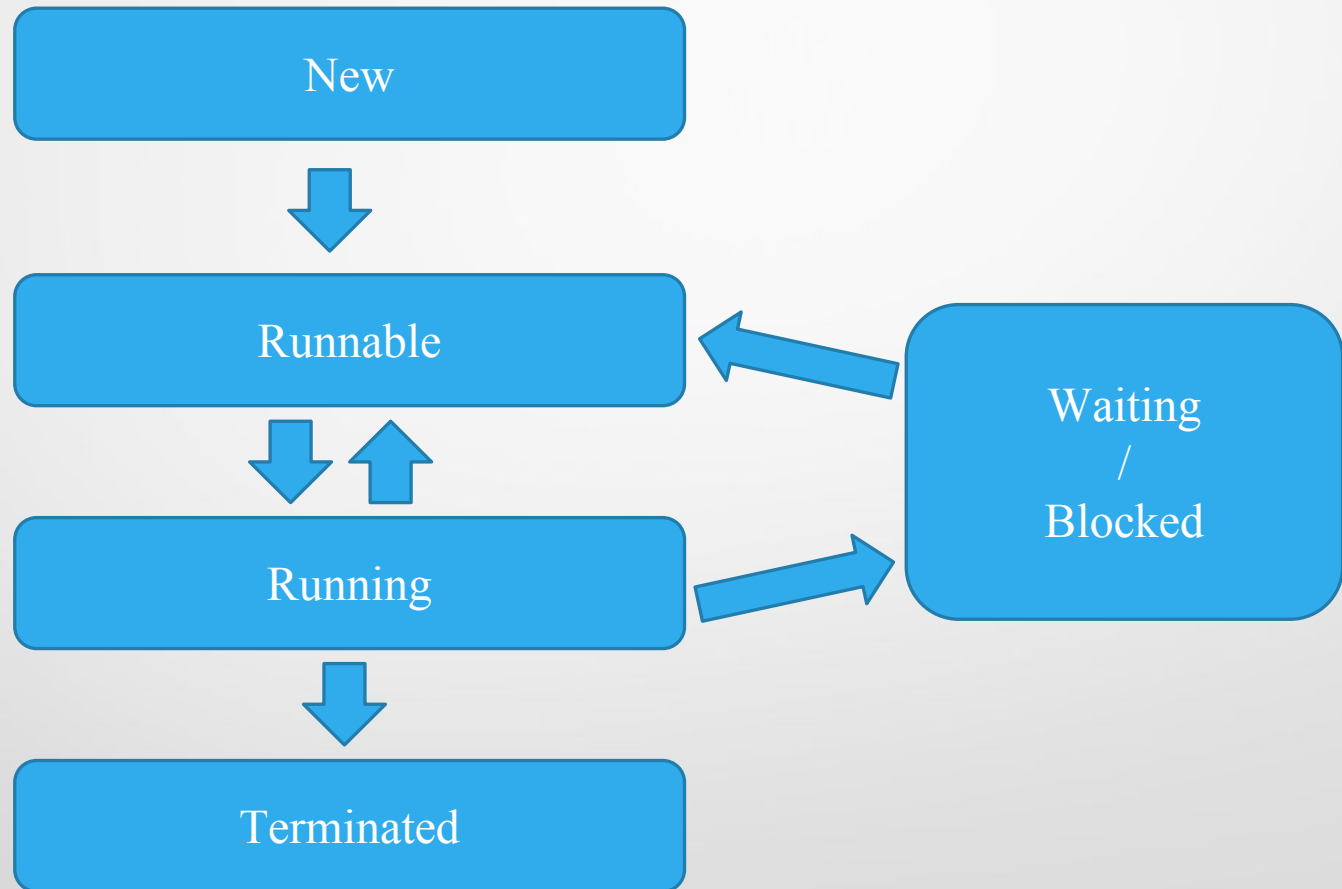

Deadlocks

# What is Java Thread?

# Thread Lifecycles

Let's create a thread

# Thread vs Process

one process  
one thread

one process  
multiple threads

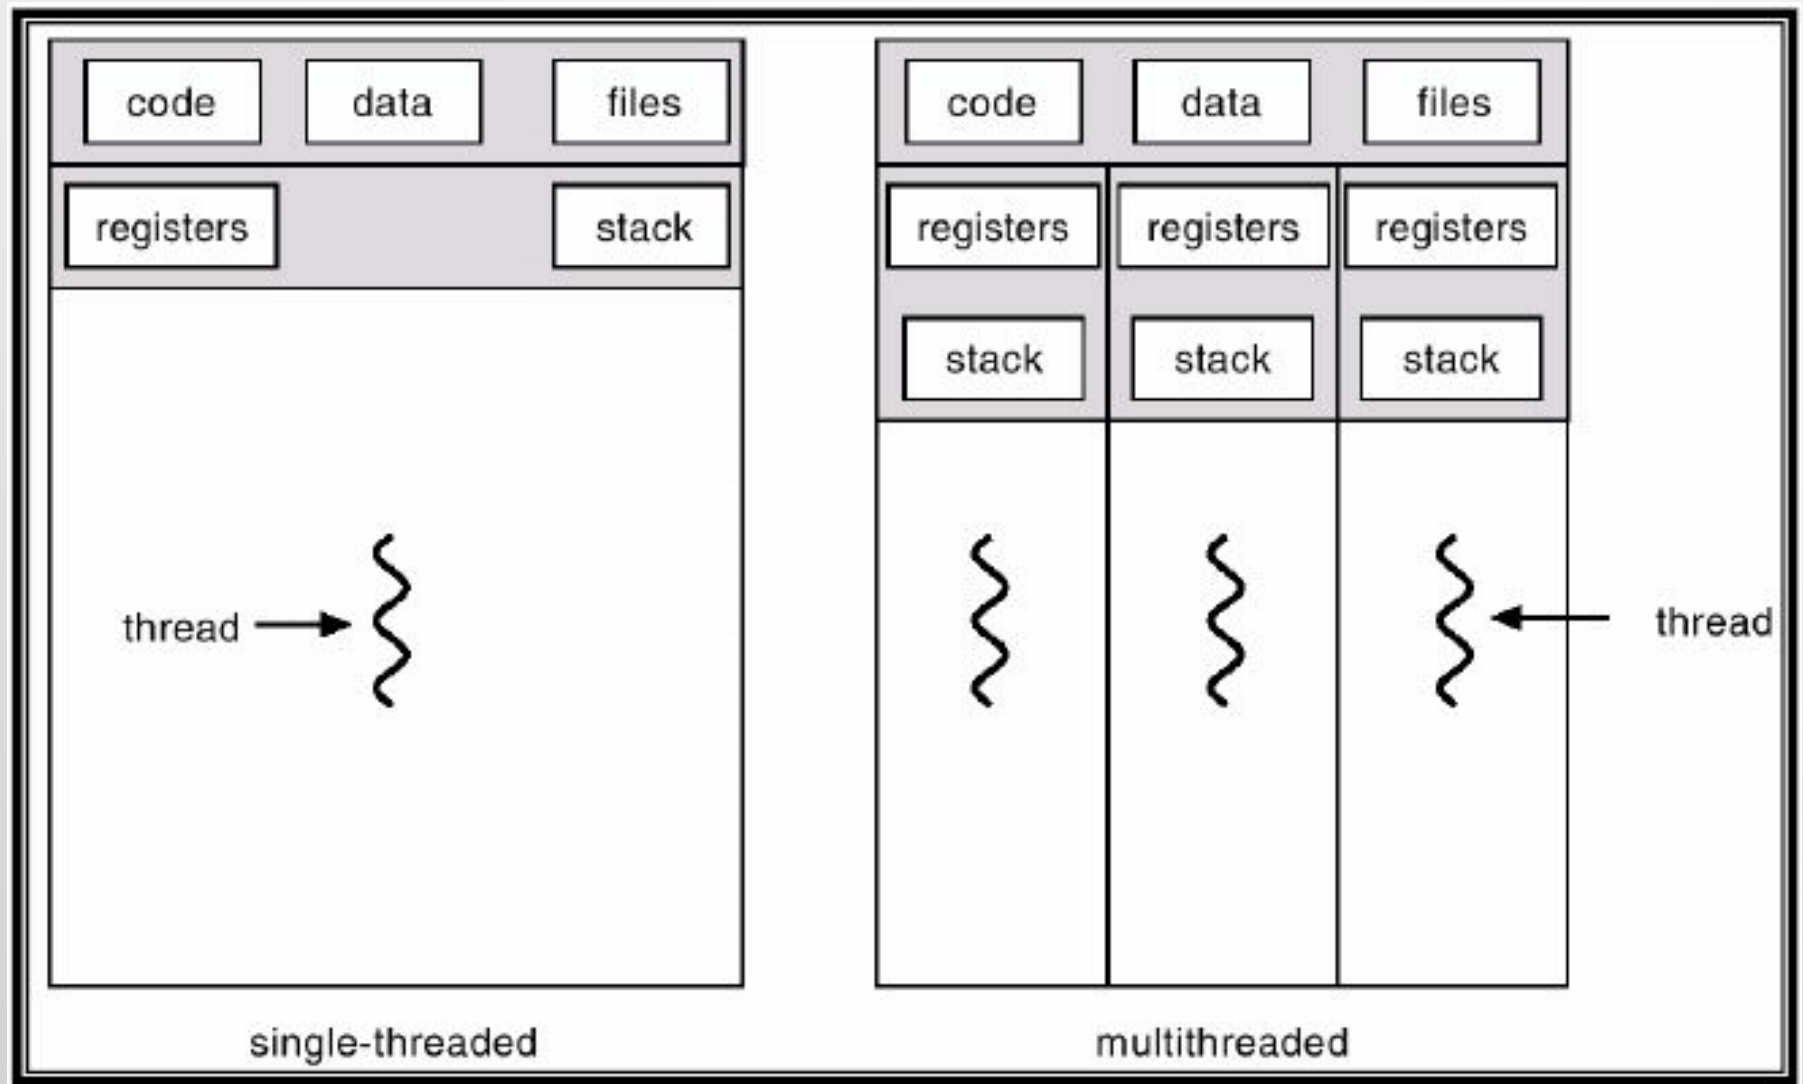

multiple processes  
one thread per process

multiple processes  
multiple threads per process

# Runnable vs Thread

# Implement vs Extend

Let's take a break

Thread.Sleep()

Thread.Join()

# Runnable vs Callable

Priority

# Types

MIN\_PRIORITY

NORM\_PRIORITY

MAX\_PRIORITY

Daemon Thread

Thread pooling

# ThreadGroup

Shutdown Hook

# Synchronization

# Critical Section

Method / Block

# Atomicity

# Race Conditions

# Atomic Variables

## Atomic Reference

# DeadLocks

# Inter thread communications

Object.Wait()  
Object.Notify()  
Object.NotifyAll()

# Interrupting a thread

# Locks

Object Lock

ReentrantLock

TryLock

ReentrantReadWriteLock

Conditions

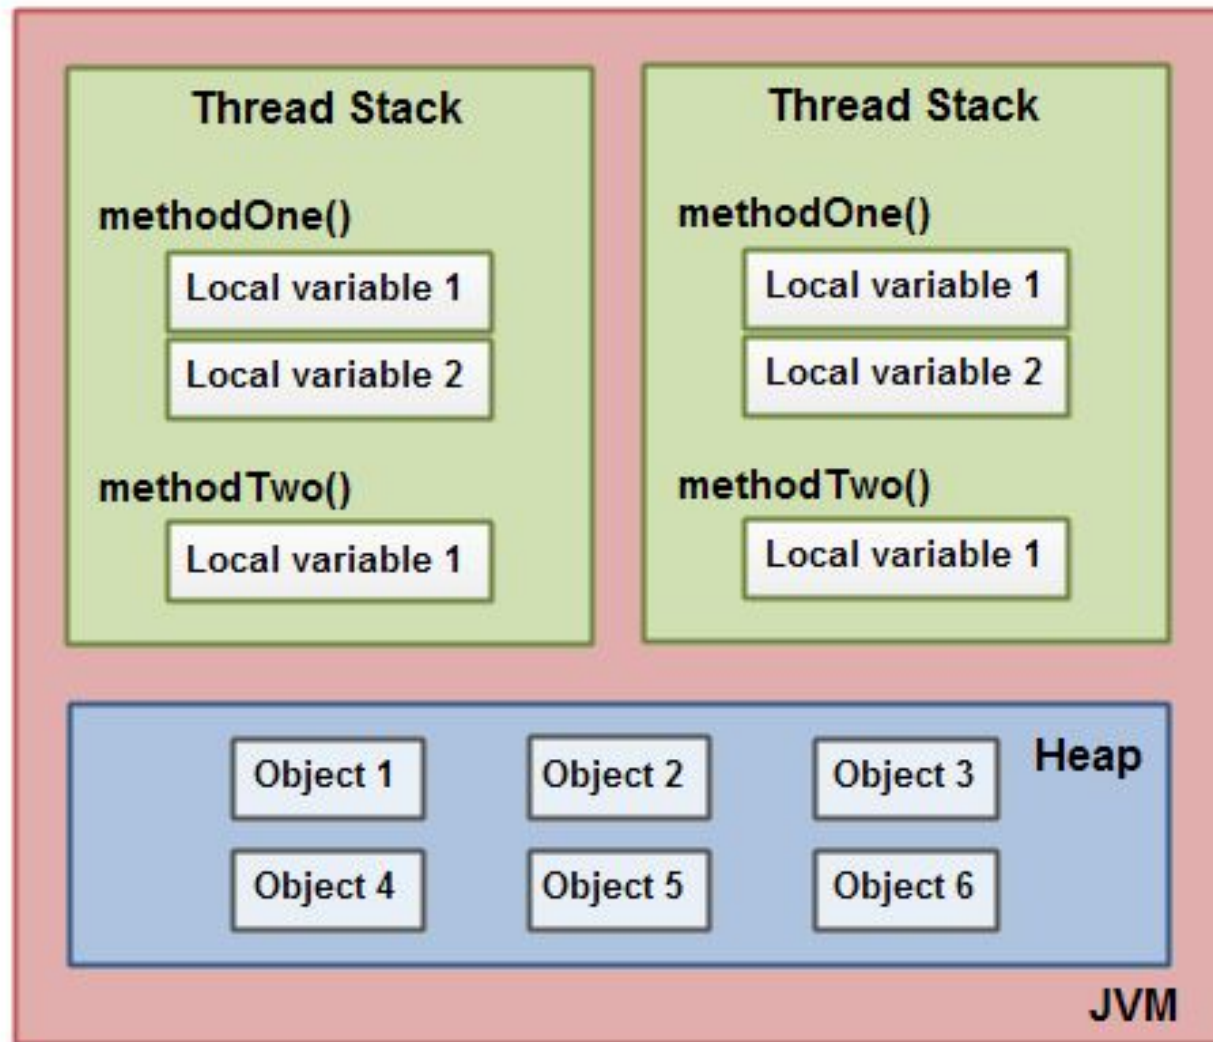

Semaphore

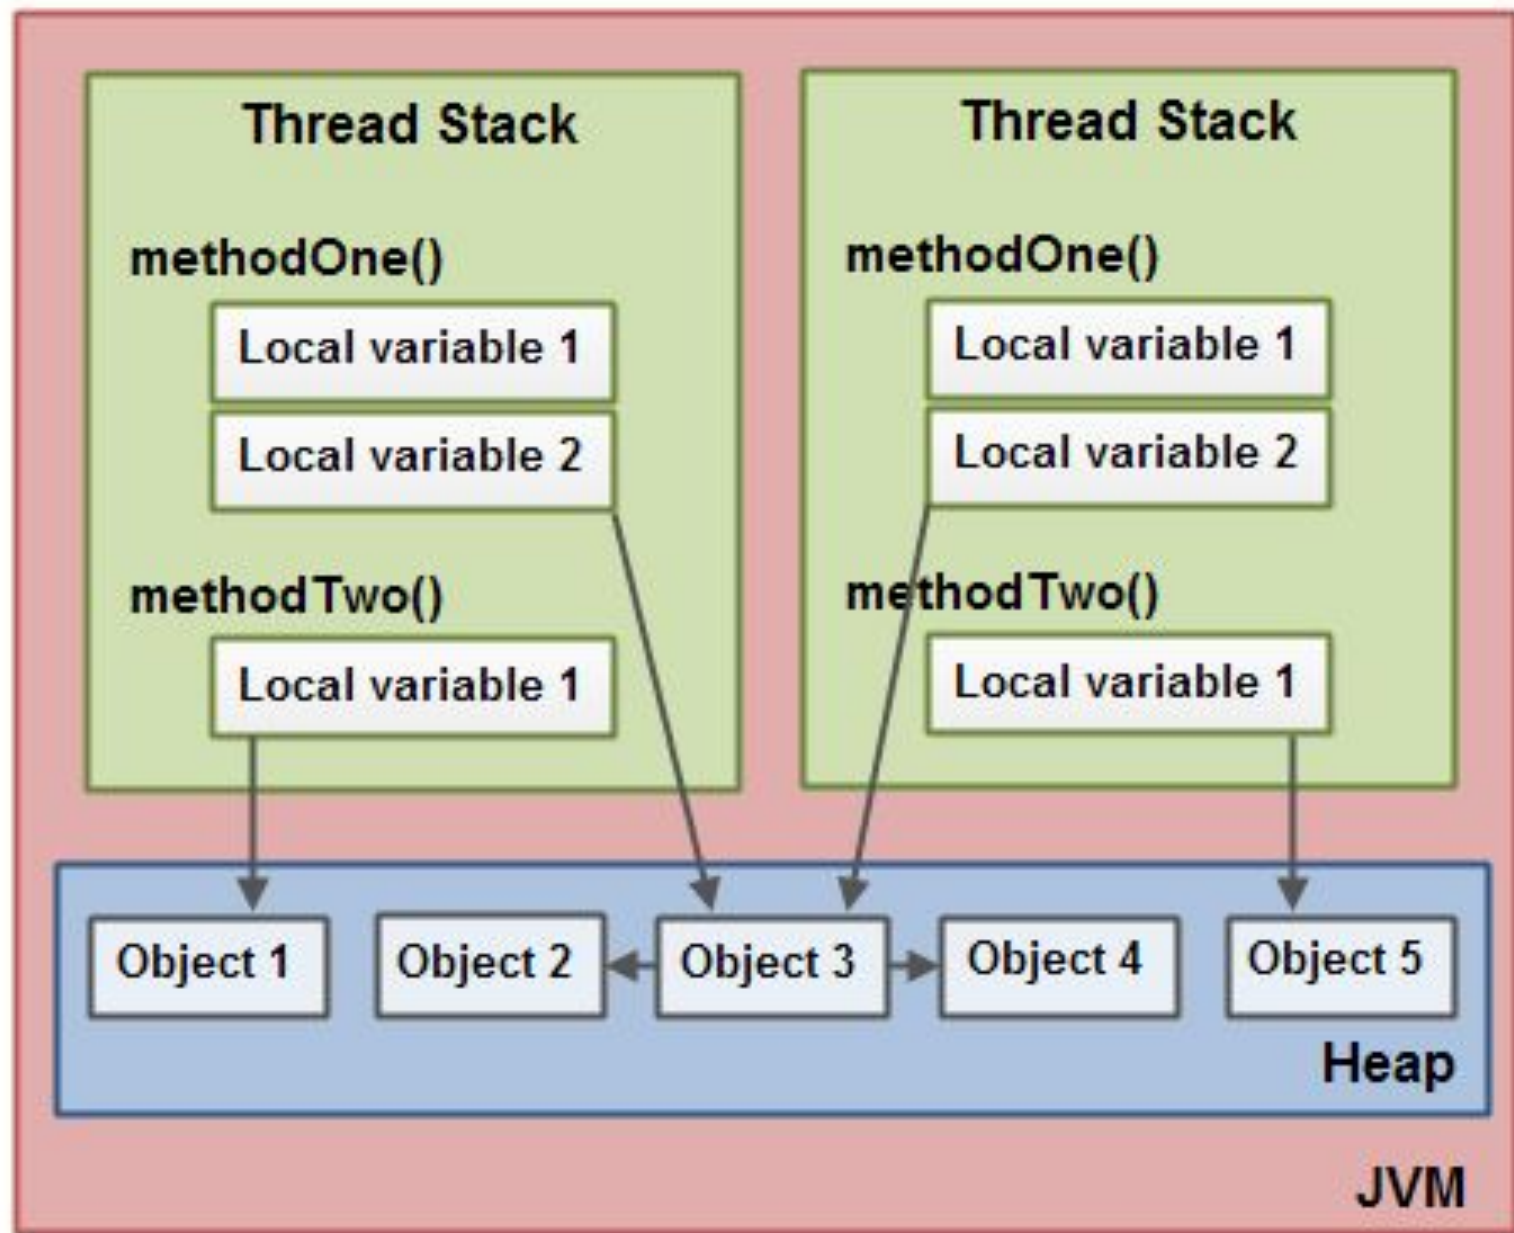

# Debugging Threads

# Memory Model

# Debugging Threads

Fun time

# How to start a thread?

1. **run();**
2. **start();**
3. **init();**
4. **none of these.**
5. **resume();**

# Which method registers a thread in a thread scheduler?

1. **run()**
2. **construct()**
3. **execute()**
4. **submit()**
5. **start()**

# Methods available in Thread Class?

1. **start()**
2. **wait()**
3. **notify()**
4. **run()**
5. **terminate()**

# Which makes thread leave running state?

1. **yield()**
2. **wait()**
3. **notify()**
4. **notifyAll()**
5. **sleep(1000)**
6. **join()**
7. **Thread.currentThread()**

# Methods in Runnable

1. **void run()**
2. **public void run()**
3. **public void start()**
4. **void run(int priority)**

wait(), notify(), and notifyAll()  
methods defined in?

1. **Thread**
2. **Java.lang**
3. **Runnable**
4. **Callable**
5. **Object**
